

VOYAGER CYBER ACADEMY

Security+ Training Program Overview

Live Instructor-Led Cybersecurity Training | 5 Weeks | Evening & Weekend Schedule

Program Overview

Voyager Cyber Academy provides a live, instructor-led CompTIA Security+ (SY0-701) certification training program designed for IT and cybersecurity professionals seeking to strengthen foundational security skills.

The program is structured for working professionals and delivered outside of standard business hours to avoid disruption to normal operations. All sessions are conducted live in small cohorts by a former NSA analyst.

5 Weeks Live online instruction	35 Hours Instructor-led training	15 Students Max Small cohort environment	No PTO Required Evening & weekend schedule

Why This Training Matters

Revenue Enablement For MSPs and consultancies, Security+ certified staff improve positioning in competitive bids and support higher-value client work.	Compliance Alignment Security+ aligns with government cybersecurity workforce requirements, including DoD 8570/8140 baseline certification frameworks.	Risk Reduction Employees learn threat identification, secure architecture, and security operations, improving organizational ability to respond to security risks.
--	--	--

Skills Developed

Participants gain applied knowledge across key cybersecurity domains:

- Security fundamentals and risk management
- Threat identification and mitigation strategies
- Secure network and system architecture
- Security operations and monitoring principles
- Governance, compliance, and security program fundamentals

Training covers all five CompTIA Security+ SY0-701 exam domains.
